

Polyair/Water (non-food grade) is a Rubberized Thermoplastic (PVC) hose made from high quality materials to make this hose look and feel like a rubber hose. It is typically lower in cost and lighter in weight than rubber hose, but is not suitable for the same range of temperatures or highly abusive environments. We offer this hose in red (NL1405) or blue (NL1406). The red is commonly used with nailers or as a shop air tool hose while the blue is commonly used as a high quality, attractive garden hose. Polyair/Water can also be used for lubricating oils or low pressure agricultural chemical spray. It is lightweight, non-marking, and resistant to regular abrasion, oil (Class B), weathering, and ozone. Its unique composition allows it to be easily dragged.

**Kuri Tec**

**4 Water Discharge & Washdown Hose**

**Temperature Range:** -26°C (-15°F) to +65°C (150°F)

**Construction:** Tube: Black, smooth PVC compound. Cover: Smooth PVC compound. Reinforcement: Polyester yarn.

**Typical Fittings:** N400 Brass barbs, N400L long Brass Barbs (higher temp/PSI), garden hose fittings, brass ferrules, pinch clamps.

\*1" comes with NPSM/NPSH thread.

Heavy Duty Brass GHT (Suffix -20)

The standard colour for Polyair/Water garden hose assemblies is blue (A1406). Each length is coupled with heavy duty brass garden hose ends and all assemblies are neatly coiled and packaged for retail display. Any "non-stock" assemblies can be made up from our bulk inventory.
