

We offer two types of stainless steel pipe fittings. Our SS industrial grade are designed to the dimensions and pressures of ANSI/MSS SP-114 Class 150 (similar to ANSI B16.3 for malleable iron) and are a more robust fitting designed for commercial and industrial piping systems in chemical plants, pulp & paper, petroleum, food & beverage, sanitary, steam systems, and general industrial processes that are subject to various stressors. Our SL lightweight series are dimensionally smaller with less material for a lower price point (SL do not meet ASME/ANSI B16.3). The SL series are not designed for industrial grade piping systems and are for use in lighter duty, non-critical applications where traditional brass or plastic materials are not suitable.

Deg/F° SP-114 Class 150 SL Light
