

## Cautions

- The Auto Wind Hose Reel is designed for home watering applications using cold water only. It is not intended for commercial applications.
- Before use, ensure the reel is securely attached to the wall and free of obstructions.
- Do not place undue force on the reel casing. Doing so may damage the casing or the bracket.
- Children should not be allowed to operate or play with the Auto Wind Hose Reel. Ensure children are clear of the hose and hose reel when unwinding.
- Always walk the hose back to the reel when rewinding.
- Regularly inspect the bracket and mounting pin for signs of wear.
- Always turn the water off at the tap when the Auto Wind Hose Reel is not in use.

## Maintenance

- Do not install the machine directly exposure to the sun if conditions permit.
- Do not soak the machine in water or chemical liquid, otherwise the metal parts will rust, which will affect the life of the machine.
- The cleaning of the machine casing should be rubbed with a wet rag.
- When cleaning the hose, pull the hose out first, and then wrap the hose with a wet rag, clean the hose when it auto retracts. When the hose is too dirty, it can be repeatedly cleaned two or three times.
- Shut the water when the machine is not in use, keep the hose completely into the casing, do not expose the hose outside the machine for a long time.

Garden Hose Spring Rewind Reel w/  
1/2" x 50FT Hose 9MM QC

## User Manual

## Installation and Operation Guide

Congratulations on the purchase of your Gartenkraft Auto Wind Hose Reel. This specifically designed unit features a slow rewind system which recoils the hose slowly and safely with every use. Pre-assembled and ready to use the Auto Wind Hose Reel comes complete with hose, hose end fittings, multi-function handspray, wall mounting bracket and screws.

The enclosed reel protects the hose and prolongs the hose life. When mounted, the reel swivels 180° allowing the hose to be pulled out in many directions. The stop and go mechanism locks the hose in place at the desired length for easy use.

## Contents

- A. Mounting bracket
- B. Mounting pin
- C. Reel containing 12mm reinforced garden hose
- D. Universal tap adaptor
- E. Hose connector x 2
- F. Spray nozzle
- G. Tap to reel connector
- H. Screw x 4
- I. Wall plug x 4
- J. Washer x 4

## Tools Required

- >Drill
- >10mm Spanner/socket
- >12mm masonry drill bit is required for installation to a brick wall

## Installation Instructions

- ① Select a suitable position to mount your Auto Wind Hose Reel. The reel should be mounted at approximately waist height.
- ② Using the mounting bracket as a template, mark the location of the four holes. Drill the holes using a 12mm masonry drill bit and insert the wall plugs. Align bracket on wall and secure with screws.
- ③ Align the back of the reel with the mounting bracket and attached with the mounting pin

- ④ Attach the tap to reel connector to your tap using the universal tap adaptor. Test to ensure the reel rotates 180° without causing strain on the tap to reel.

- ⑤ Optional- The hose reel can be securely locked to the bracket by placing a padlock (not included) through the hole of the pin under the bracket.

## Instructions for Use

Now that your Gartenkraft Auto Wind Hose Reel is securely mounted and connected to the tap, it is ready to use.

- ① Before first use, turn the water on at the tap and unwind the hose. The hose will unwind by simply taking hold of the hose and walking away from the reel. This will allow water to flow freely through the hose and reel.
- ② The automatic locking ratchet will hold the hose in place at the desired length. The mechanism will 'click' as the hose is locked in place.
- ③ To retract the hose, pull on the hose until you feel the reel release and start to retract hose. It is recommended that you walk the hose back to the reel.
- ④ Before fully retracting the hose, turn off the tap and release any water through the hand spray. Always retract the hose after use.
