

Introducing the upgraded **Serpent Premium PRO**; the trusted favourite you know and love, now enhanced with improved features and performance. Thanks to cutting-edge manufacturing technology and increased capacity, we're offering this industry-leading hose at a more competitive price point.

HD CLASSIC

SERPENTGRIP

360°

WORKING PRESSURE
150 PSI

BURST PRESSURE
450 PSI

Choose Your Ideal Connection

Available with **Heavy Duty Classic** traditional solid machined brass male x female garden hose threaded ends with PVC bend restrictor end guards.

Also available in our new **SERPENTGRIP**, featuring durable anodized aluminum fittings with ergonomic swivel end guards. The integrated live swivel design allows the hose to rotate freely during use. Currently available in select colors: orange & green.

Orange	5/8"	25, 50, 100 ft	A1459063X(length)-21

SERPENT ADVANCED RUBBERIZED COPOLYMER

High performance compounds for water applications in construction, facility maintenance and landscaping.

HIGH VOLUME WATERING

Optimized for maximum flow in high-volume applications like pressure washing, washdown, and large area sprinkler use.

FDA COMPLIANT TUBE FOR ENHANCED WATER QUALITY

Formulated to reduce compound impartation for superior water quality than non-FDA hose.

Serpent HD300 is an Industrial & Commercial Grade Rubberized Hybrid Polymer Water hose for yard & equipment washdown, pressure washer supply lines, commercial landscapers, construction sites, or for users looking for a more robust watering hose.

Industrial Performance

Its durable blue cover resists weathering and abrasion, while the heavier reinforcement will remain flexible and kink resistant in hot and cold weather. Additionally, NL1476 can be used in air tool applications with correct hose end configurations.

Ends	Size (ID)	Length	Part Number
Serpent Industrial - with Heavy Duty Classic Brass Ends & PVC Bend Restrictors			
Male x Female GHT Ends	1/2"	25, 50, 100 ft	A1476050X(length)-20
	5/8"	25, 50, 75, 100 ft	A1476063X(length)-20
	3/4"	25, 50, 75, 100 ft	A1476075X(length)-20
	1"	50, 100 ft	A1476100X(length)-20
Male NPT x Female NPSH	1"	50, 100 ft	A1476100X(length)-23

SERPENT ADVANCED RUBBERIZED COPOLYMER

High performance compounds for water applications in construction, facility maintenance and landscaping.

HIGH VOLUME WATERING

Optimized for maximum flow in high-volume applications like pressure washing, washdown, and large area sprinkler use.

FDA COMPLIANT TUBE FOR ENHANCED WATER QUALITY

Formulated to reduce compound impartation for superior water quality than non-FDA hose. Garden hoses, including FDA approved ones, should not be used for drinking water unless flushed properly before each use.
