

Serpent Industrial Heavy Duty Brass Manifolds
provide reliable water distribution for demanding applications.

Featuring premium brass construction, a reinforced body design, and TruFlo 13 mm full flow bore technology, these manifolds deliver dependable performance and maximum flow in high-volume applications such as pressure washing, washdown, and large-area sprinkler use.

**FOR MAXIMUM
WATER FLOW**

**HIGH GRADE
BRASS ALLOY**

**EXTENDED ANTI-SLIP
RUBBER GRIP HANDLES**

Each manifold features a reinforced construction at critical stress points, a corrosion-resistant brass body, and easy-to-operate mini ball valves. Individual outlet flow control allows users to manage water distribution with precision and confidence.
