

This chart illustrates tube and cover compatibility of Goodyear Engineered Products fuel transfer hoses. **Please Note:** Regardless of hose compatibility all biofuel hoses should be drained after use. Biofuel sitting inside a hose for an extended period of time can/will degrade tube material and result in premature failure of the hose.

COMPATIBILITY BY PRODUCT									
All Goodyear Engineered Products Fuel Transfer Hoses are compatible with GASOLINE AND DIESEL				Hose Tube & Cover Compatibility ETHANOL & BIODIESEL
